Importing The Dataset

Loading the excel data file into pandas using the read_excel() function. Locating the directory of the excel file at first which is more efficient to keep the dataset in the same directory.

Data= pd.read_excel(r"File_location")

r stands for "raw" and will cause backslashes in the string to be interpreted as actual backslashes rather than special characters.

```python
In [1]:  import pandas as pd
         import os
```

```python
In [2]:  pwd
```

```
Out[2]:  '/content'
```

```python
In [4]:  variable = pd.read_csv("/content/Crude Oil Prices Daily.csv")
         variable.head()
```

Out[4]:

	Date	Closing Value
0	1/2/1986	25.56
1	1/3/1986	26.00
2	1/6/1986	26.53
3	1/7/1986	25.85
4	1/8/1986	25.87

```python
In [5]:  variable = pd.read_csv(r"/content/Crude Oil Prices Daily.csv")
         variable.head()
```

Out[5]:

	Date	Closing Value
0	1/2/1986	25.56
1	1/3/1986	26.00
2	1/6/1986	26.53
3	1/7/1986	25.85
4	1/8/1986	25.87
